

CSF-HRAC HALF RACK

The Half Rack delivers versatility, safety, and performance for athletes of all levels. Designed for a wide range of lifts, it features J-Hook style bar holders and adjustable safety stops for added confidence during workouts.

Enhance training variety with standard band pegs, multiple pull-up grips, and a 650 lb (294 kg) dual safety catch capacity, ensuring users stay challenged and engaged. Eight storage horns keep weights organized and off the floor, maintaining a clean and efficient space.

Built from heavy-gauge steel with commercial-grade components and a high-quality powder coat finish, the CSF-HRAC Half Rack is engineered for durability and long-term performance. The wide base and reinforced frame provide superior stability, while the high-load capacity makes it suitable for serious strength training.
