

Through innovative fitness technologies, SCIFIT continues to provide wellness solutions that meet the needs of a wide range of individuals with the newly redesigned Recumbent Stepper - StepOne™. The low impact StepOne provides a smooth, total body functional movement. The StepOne features low starting resistance, wheelchair access, comfort adjustments, customizable programs and documentation to help users reach their goals.

KEY FEATURES

- User defined stride length from 2" to 11.5"
- Optimized 1:1 arm to leg ratio to promote natural movement.
- Low starting resistance (6 watts) with 20 levels adjustable in .1 increments, providing 200 levels of resistance.
- Direct wheelchair access along with step-through seating and grab bar allow for easy on and off.
- Arm length adjustments and rotating hand grips provide user comfort and custom fit.
- Small footprint along with integrated transport handle and wheels allow for easy placement.
- Full color touch screen with easy operation displays exercise readouts beneficial for users and clinicians (ex. stride length, ascent, watts, METs).
